NEW YORK, Oct. 31—[Special]—A Washington special sats. The collector of costoms at Boston has reported to the treasury department a question of interest to importers. It relates to appeals from his decision assessing duty on the appraised value of certain grapes in barrels imported from Liverpool. In the first instance, the duty was assessed on the value of the grapes, which was paid. Subsequently the appraisers made a supplemental return of value, and included therein the value of the barrels, which appraisement the importers declined to pay claiming the original appraisement wis in it and conclusive. The solictor of the treasury is called upon for his opinion.

A TINGO OF THE FATRAME TYPE

From the Lednon Spaceter Mr Blane's nonunation is a low to every sound English liberal, and would be even if to we're not so posicureed a jungo But then he is a jungo of the extreme type. He has a ways defended what is in principle a policy of conquest. He is betheved to hold that the time has a rived when the brated States should become the Whet the claims states should become the North American republe, should persuade the Canadian don men to join it, and should exend is direct authority down to the isti-mius of Papana. He was, moreover, the secretary who denounced the Claythe secretary who demonstred the Clay-ten Bulwer treaty and its similar-the joint guardianship of the Branas canal—upon the ground that the I nited States must control the nteroceanic waterway, and who during the Peruvian war endeavored to induce the Spanish-American states to place themselves under the Arterican states it place themselves under the arrowed protectorate of the American government. He claims, in fact, for the union, under different forms, a sovereignty—or at least an effective acknowledged leaves alp—throughout the two Americas, adding that the trade of states like Peru naturally belongs to the receive of the Sates and not to those of Europe. He can hearly well to appropriate formed theoret. bardly wish to conquer Canada, though he rray desire to absorb it. The Proposition and Despeta Managemen o Boss Buckley and it Consequences,

SOR OF SPECIAL P. OF THE ORPGONIAN SAN FRANCISCO, Oct. 21

Nowhere is the mackine system of politics be tar organized or more successfully managed than in Sun Francisco Both parties are dominated by their worst elements and each has its single a solute master. There is no difference in the purpose o notality of the fival ma-chines, but the democratic inanagement from the openness of its methods is the more casy and interesting junity. He specess, its unques-tioned authority and us after altamelessness are precise of its completeness and strength as a asystem; and examination of this system leads of all nost to foult the practicability of governin at by the people.

in it by the people.

The conditions within the democratic party in this city which enable Chris Buckley to hold alsolate control me the filigitimate results of a reform movement two years ago. The party as a mass had long been disguisted with the abuses which had proven out if the old primary system. Through it and by methods we I known everywhere, the wird in magters had es ablished the methods. overywhere, the wird in unagers had as abhabed themselves in complete massery of the party and their rule describing the easy steps from abuse to corruption and from corruption to actual roberty aroused w despread diagnost and led oparty to child in A mass meeting of democrats deposed the wardprassagers by doing away with the privary system. The city was divided into forther even districts and in each of them it was decleted that a permanent on the should be organized and to those ciuts the party organization was given in trust. The city and county commettes was to consist of a delegrate were to be chosen by the cluts in proportion of their minute ship, and in all respects these fortherworm gameatures were to be consistent and in all respects. picture a their mindership, and is all respects these forty-seven rganizations were to assume the primary work, at the parts. The plan locked well on paper. When a right of the parts argued that as the respectable men we argued that as the respectable men we note numerous the every club; wid with numeral congratations and glowing are actions of a political milenum, the "respectable element" adjourned that mass needing and proceeded to their proper cally burn as.

And revolution amply use in time to disarrange the plans of George Heart, a prominent cardidate for in governorship, who, so the story goes, had brigated with the ward managers for the delivery of fifty-law delegates to the state convention of fixed for Heart. The predrament of this highly homorable gentleman was well known to Chris Buckley, who had been an active "worker" under the old primery system, and be proposed to Mr. Hearst to "fix" the cut delegation in high interest or \$10,000 cash down, an spike of the reform promery system, nuc be proposed to Mr Hearst to five? the city delegation in his interest or five? the city delegation in his interest or five, where the delegation is his fine rest or five, and the merchant is a concluded to risk fent thousand in the effort. This gave black ey the capital to carry out a plan he had concluded to the organization of the proposed clubs a section of the same could be present in each district meating to bet the uting going in good shape? ENGLISH ACTION EXPLAINED

"I especially distike," wrote Secretary Blain to Minister Hurbut in Peru, "to see England winning great commercial triumphs in a field elongs legitimately to the United States "Mr. Blaine," screams the English press "will, if elected president, regard it as his chief object to promote a great American confederacy under ægis of the government at Washing on, which would tend to increase the export trade of the United States at the expense of that of Great Britain." And this, with the additional reason that is Cleveland is elected and a de notratic congress with him, it is expected that more favorable terms will be made for importation of British goods into the United States, fully explains the activity of the English, both England and America, in our present politi-

stand at opposites. The double effect of Brillish interposition in our political affairs is to stimulate American sentingent and awaken American purpose to uphold American policy against British policy, and to arouse the manufacturing interests of the United States, including the

The influence which has solidified for Cleveland the English in America, has come "from home." It has been put in operation heirs, as in all parts of the United States, by articles in the English newspapers, by emissaries from England, or by a perception of an opportunity enlarge English trade. Wherever a dweller there for revenue only, and expects, when he has made money enough, to return "home" and stay there. The English see in this policy an attempt to supplant English trade and English influence with American trade and American influence. This is the basis of their opposition to Blaine, which is increased very much by his many speeches in defense of American manufactures. The English do not find in the United States desire, and they see in the policy outlined by Mr. Blaine while secretary of state a result that would interfere with their trade with South American states, of which they have long held a menopoly; and so the English mercantile interest, both in England and America, is "solid" for eveland, the man not strong enough to have any ideas or purposes that would conflict with British interests, and the policy of whose party is favorable to the importers rather than the manufacturers of the United States.

It was the desire of this same mercant le in-terest of England to see the United States brokon into fragments by the rebellion. Such reen into fragments by the rebellion. Sight re-milt it was foreseen, wou doet up hostile gov-eraments in this country which would risunal-ize each offer, and so destroy the only power in America that Sould prevent English inflaence from becoming paramount in the western world. Moreover, the south, under the rebel government, of ered a most populsing field for the trade of England, as the consideration of the confederate states prohibited in positive terms a faulif for protection. England, theirsfore area tariff for protection. England, therefore, was against us during the whole period of the rebel-She made haste to accord the rebels belligerent rights; she let locse her Abibanius to destroy our commerce or drive it from the seas, for which she was afterwards compelled to pay great sums of money; she gave, ald to the re-tellion in ways that, had our government not been so sorely pressed, would have caused an instant declaration of war against her and the invasion and conquest of all her American posglasses through the holes in the proseculum, arch, or any other conventent place out of sight of the audience. This system is said to have been (laborated by Robert Houdin, therefore the conjurer, and it was suggested to him by a game that two of his children had invented for their own amusement. Taking the idea from them and following it out, he laid the foundations of the second sight, in which he and his sen soon became very expert. There is it nothing appearance, about it, periher is the ssions. But her hostility to us was no ideal or abstract thing. It was based simply on a desire to rush her own interests, which she saw could be done through division of the United States be done through division of the timed Sines and success of the rebellion, just as she perceivis now that the defeat of Blaime and the election of Cleveland would be the best thing for her that could take blace at this firm in America. Hence the expression of English journalism that this presidential contest in the formed States is the more momentous serior for United States is the most momentous event for british interests that has taken place in America since the suppression of the confederate re-

The democratic committee in Portlant has caused to be printed and is now distributing through the state fifty thousand prohibition tickets. A supply will be sent into every procent in the state. Kind as this action is on the part of the democratic committee, prohit itionats are not at all likely to be misted by it. How long will it be until this same committee will be waging parelenting war on prohibition and denouncing its advocates as fanatics and fools? The time certainty is not further of than the first active contest in the state in which prohibition shall be concerned, and that time in all New York that "the county democracy would make a deal with the republicans even yet if thereby they could further their own inturests. A few days ago the Star, organ of Tammany, charged the "regulars" probability is not distant. Frantic appeals the same committee that now kindly prints and circulates prohibition tickets. It may be supsaying; "Despite all their fierce and rat Chicago, and all their estentations pledges of loyalty now, posed that such eminent temperance reform as as "Dick" Gerdes, "Capt." On the other land, the Times asser a that Tammany's intention is to sacrifice hoof of the party which is the main grop of the Transany candidate for mayor, and altogether the quarrel as it stands simply means that the parties immediately in interest care more for

FRAUDULENT VOTING.

A registry law is, of course, of no value unless it is well executed. It may be the occasion of much corruption. In Chicago, for instance, there are thirty-one voters registered as living in the rooms connected with Boss Mice McDorand's gambling I ell, but inquiry, showed that the number acqually there is just thirteen, and of these only two are registered by their right names. The registry list is apparently made up in good part from old directories. In vermon, where there is a registration and check list in the large towns, the legislatore has now under consideration a bill to prevent persons voting under a fictitious name. The bill provides that any person who assumes the name of any other person, living or dead, and votes for any town, county or state officer under such name, shul-be fined no more than \$100, or imprisoned for not more than one year in the state prison. This s not essentially different from the States law, but it is deemed haportant that it should be incorporated among the statutes of the state to guard against that kind of fraudulent voting. Where no check list is kept i. s impossible to guard against it, and even then a person mar, by ascertaining that some man whose name is enrolled is out of town, or sick, vote under his name. While registration into posse many obscales to fraudulent voting, the authorstone will present an entire the authority and the second of the control of the contr evil practice will not be enthely prevented so long as our important political contests are decided by trades among party managers, as in New York city, rather than by the election of the people.

CENTENARIANS IN FERMONT. Mr. Dufur, who has just returned from a Mr. Dufur, who has just regarded 1 on a visit to Vermont, his native state, was impressed, as most visitors are, by the number of old mensill engaged in business there. The Green Mountain state is a healthful state, and it is not probable that any other people on the face of the globe can show such longevity in proportion to their numbers. During the past three years sixteen persons have died in Vermont exceeding a century in age, and one of the incumber was postumater for the last half of his life up to his hundredth year. During the same period 949 have died at over eighty years of age. This is a percentage of old people seldom if ever equaled since the flood. Perhaps one reason for this tenacity of life may be found in the fast referred to by Mr. Datur in his conversation with our reporter, that so many of the young people go west, thus compelling their fathers ard mothers to continue their active habits, fristen, of occupying a quiet corner by the fireside in the auumn of life. There is no doubt that the m tenance of the activities and interests of middle life in old age contributes to the happiness as well as the length of life. The Vermonters learned years ago the folly of putting the r property into the hands of their children and becoming dependent apon them for support in old age, and few of those now, whose children remain with them, entirely abdicate possession and control over their own affairs. If the bove want to set up for themselves, they go to the cities or to he west, and the old people main-tain their hold upon life by not letting go.

APPOINTMENT OF PRESIDENTIAL BLECTORS.

Please (tale and settle a disagreement, whether the constitution of the United States or any act of congress prohibits a state legislative from electing electors to vote for president and vice president of the United States, the people of said state being willing?

The constitution says "each state shall appoint" the Marters it in rock was reconstituted.

[The constitution says "each istate shall appoint" the electors "in such manner as the legislature thereof, may direct." Formerly, in some of the states, and in Louisiana and South Carolina until just before the wer, electors were chosen by the legislature. They could be so chosen now if the states should see fit to change the existing laws, which provid: that they shull be elected by the qualified electors of the executions. be elected by the qualified electors of the seeral states. The legislature could not, of course, elect without previously having changed

these laws. It usually takes about a morth to get the election returns in from the southern states. West Virginia has not yet fully reported on her election held last month. Few of the counties a reached by elegraph, and no enterprise is shown even in the use of the weekly mails. But a special dispatch to-day says that the returns from all but four countles are in, and the democracie all out four countes are in, and the democrace majority in the state falls below one, thousand. It is quite possible that the result of the pres-dential election may not be known for a week or more after next Tuesday, for West, Virgin s. Virginia, North Carolina or Technessee may be extremely close, and the vote of one or more of them may decide it.

Not a member of the old guard of the republi-Not a member of the cid guard of the republican party will ever cease to vote the republican teket in a national election so long as 155 electoral votes of the old slave and ex-rabel states are massed in one body. Before there can be any relaxation of party lines in the north there must be some evidence of dissolution in the south. It is as much a duty now to vote against the solid south as it ever was. It is not forgotten that the south has been solid for thirty years, and that the resulthers never seem into years, and that the republican party came into existence as a protest against lit. Why should not the republican party still protest? Or, if it does not now, why should it ere liave done ec?

The remarks of Bisic p Ryan of Philadelph a, at his reception in New York the other evening, show that the Catholic church in America as slowly becoming liberalized. The fares on the New York Central, the parallel line, are only two (centra mile, established by state law, but, although the people in the instit of gaing and smoking the drug has that state are accustomed to cheap fares, their propensity to travel is stimulated by reduction. This is the case everywhere. Cheap fares promote bestness and increase earnings. It is only the managers of railreads, who pay no fares, several million dollars worth of the drog, and

Description of Dr. InnegThompson VIEDLA COPPEE HOUSE,

LOCAL AND GENERAL.

Hallow k'en.—Last evoning was Hallow e'en, or All Hallows eve. All Hallows, or, as it is more commonly called, All Saints, day, takes its origin from the conversion of the Yantheen at Rome into a Christian place of worship. Hallow e'en, however, seems to have but little of a religious nature connected with it, on the sevening the spirits of this and other worlds were supposed to wata abroad and altend to a great deal of business. Even the human spirit could detach liself from the body for the occasion body, and stroil around willing human spirit could detach liself from the body for the occasion body, and stroil around willing the human spirit could detach liself from the body for the occasion body, and stroil around willings of the lime. The Social kept up the traditions of Hallow e'en botter than probably any other people, and their great poet Barnes as written some fine lines about it. The beleviation of it has nearly gone out of date in this country, but under the names of "Holler Fre," "Nationack eve" or "Cabbage might," the young people of some sections think they are licensed to bold high jinks, roaming abroad, currying off gates, building fences across highways, placing wagons on top of buildings, and pulling and currying off all cabbages which may not have been taken it. It is protable that very few in this state even thought of Hallow e'en last evening, and it is just as well that such nonsense should die out. HALLOW E'EN. - Last evening was Hallow

A Handsonk Nomber.—The November number of the West Shore is out, and will be found well worthy of perusal. An article on the "Hop Fields of Physiling and White River" gives a great deal of information in regard to hops and hop-raising, which has developed into such an important branch of agriculture in it is section. It is flustrated by a number of sketches of hop farms, hop kims, etc., which give a good ices of the way the hope are prepared for marked, a double-rage illustration is devoted to the Mechanics' fair, giving a truthful and beautiful view of a large part of the interior of the building, showing the decorations and exhibits. Another illustration contains portraits of the president and officers of the fair association and a view of Porland and Mt. Hood in the distance. There is an article on "True Journalism," which should be read by every father and mother in the land. An interesting account of an ascent of Mary's peak, is furnished by J. M. Battimore, under the title of "Glimpses of the Willanneth Valley," and Harry L. Wells con tributes a story entitled "Buried Treasure of "Hellands." A HANDSOME NUMBER.—The November num-

"HELIABLE' JOURNALISM.—Several days ago, a norming contemporary always noted for its wonderful enterprise in gathering talegraphic news, published a dispatch that Ruscoe Conkling would deliver a speech. Wednesday evening agalast Blaine and favoring Cleveland. Quite a number of democrats, like drowning mencatching at straws, received the "mewe" careris, and saw in its faint hope that Conkling could divert enough republican votes to give New York to Cleveland. And then half a dozen or more who I appened to remember that there was a reliable source of information in Portland, applied to The Orrigonian to learn whether it had such a report. They went away satisfied that Conkling wasn't going to make a clown of himself, even if he did not love Blaine. Those who wished and shoped the story would prove true have since been waiting to read in the very enterprising journal which made the amouncement some report of the speech. Perhaps their private telegraph fine has gone down.

Shoffing Importation of Pork.—The pork

STOLFING IMPORTATION OF PORK.—The pork to keep Chicago bania, bacon and lard out of the markets, and hoge are pouring into Portland by the hundreds from all quarters. W. W. Spaulding received a arge lot from the vicinity of Pomeroy, A. H. Juhnson a lot from southern Gregon, and O'Shea Bro's, are also receiving many: one of the drovers in charge of a hand remarked yesterday, "the country is full of hogs. So, with cheap wheat it is to be hoped that Oregon may this year be saved the disgrace of importing hog products and the Oregon hog may be able to take care of his own territory. It is probable that there is more pork each in Gregor in proportion to the population than in any other state in the union, and two logs fulls section has failed to supply the demand on that account. But as the number of togs increases and the number of people who cat bacon three imes a day, 365 days in the year, decreases, the log account may in time be made o balance.

DREINQUENT CONTRACTOR—Sult. was com-

DREINQUENT CONTRACTOR - Sult was commenced in the state circuit court yesterday by the Portland Lumbering Company and Kocher & Freeman against N. O. Anderson, and the city of Portland. Anderson had the contract to build No. Three's new engine liouse. The Portland Lumber Company furnished him with lumber amounting to \$380, which was used in the construction of the building. Kocher & Freeman planetered the building and have \$250 still due on the work. The defendants filed a proper statement of the claims with the county clerk with a lion therefor. The plaintiffs demand judgment and a decree that their claims declared a lieu against the east half of lots 7 and 8 in block 315, and that the property be sold to satisfy the claim.

TRYING TO CHECK EXTRAVAGANCE.-Not long

fired and Professor G. M. Miller, president of the Philbmath college institute, was introduced by Mayor, T. W. Bryan and delivered an address from a fatforn car. At the conclusion of his remarks a silver spike was driven by J. Henkle, Sr., the oldest pioneer present, who arrived in 1852, "when ox teams toiled the plains across and made the journey slow." If all goes well it will not be long before there will be a "last spike" driving on the C. P. R. B.

Two More.—Norton Michael of McMinnville was brought in pesterday by Deputy United States Marshal Shipley, on a charge of selling liquor to Indians. He had an extinuation before United States Commissioner Paul R. Deady and there being no testimony sufficient to controvert his ples of not guilty, he was discharged. John Couningham was brought down from The Dalles by Deputy Marshal Johnson on a similar charge and was beld to answer. And still the unintered savage hungers and thirst after the intestine consuming red-eye of the paleface and still there are Good Samatiangs arroung the whites who will minister to him, and take their chances. Next!

GOF A CHANCE TO "RUSSEL ."-Misery likes company, and those of our citizens who are complaining of hard times may derive some complaining of hard times may derive some consolation from knowing that times are some whatracky on the other side of the Rockies. At St. Hand man recently advertised for an office boy at \$2 a week. He received 250 answers. The place was given to the writer of the following: "Mr. P. 35: i want the Joh my fokes is not rich & they got to russedt. They are ded. It betse hel how hard lines is I am 14 & kin do chords i look good with new close on i wold like to git a good place in yore offs i kin lem fast."

THE KOOTRYAY RATLEGAD,—Mr. S. O. Brown, chief euryeyor for the Columbia and Kootenay Transportation Company (the Captains Ains-Transportation Company (the Capitains Ams-worth's enterprise), is in the city on I will re-main several days. His force has just completed the selection of 40,000 acres out of the 750,000 acres granted by the British Columbia legisla-ture around Kootemy lake. They have also sur-reyed the line for a railway comecting this lake with the Columbia river. This will be about fifty miles long, and work will begin next year. Prelim mary work has been suspended for the winter.

SHE WOULDN'T TRSTIFY .- Henry Reise, a SHE WOULDS'T TESTIFY.—Henry Reise, a dirty, low-lived hound, was up before Justice White yesterday on a charge of assault and battery on Jennie Aven, a hideously ugly half-treed enaw, with whom he has consorted for a long time, and for beating whom he has been up in the police court many times. When the trial came on the waman refused to testify against the britte, and he was discharged. This pair are a disgrace to the city, and should be driven out of it.

DEMECRATIC RALLY,-The following speakers

IRISH-AMERICANS.

A Rousing Mass Meeting Last Night at the Masquic Hall-

Eleguent Address by Hon. A. O. Marsh of Vancouver -- Ruch Entantiaum Manifected-A Telling Argument.

Threatening weather and the possibility of a rainy night in no way served to cool the ardor and enthusias:n of the Ireh-american citizens and enthusiasm of the Irah-american citizens who support Blairs and Logan, and in making their rally last night at Masonic hall a feature of the campaign. The puny efforts of the demogratic leaders to get up, a meeting "down in Couch" to counteract the effect of the Irish-American den constration for Flatte were futile, for hardly had the clob marched into the hall to the inspiring strains of "Marching Through feeting" that every seat was quickly filled, and many not able to find even Essening room were compelled to leave. The meeting was called to sorler by Mr. Dominick Kavunaugh, who introduced the Ess: Portland glee c.ub of six voices, which many with great effect a campaign song, which many with great effect is campaign song, where going to the pole, loys,

We're going to the polls, boys, We're going in our night, Singly for Bluine at d'for Logan." Singley for Buline at d for Logan."

The singling was greeted with great applause and continued by the enthusiastic judience until the club reappeared and sary another "campagner to the music of "Marching Through

Herrigia."

At the conclusion of the sing m President
Karanangh in rodu set to the audicace the speaker, of the evening, the Hon. A. O. Marsh of

of our great republic planted the tree of liberty, whose oilspreading branches scalered fifty will ious of free men; that when there were historic names of trish birth that since that time poured out the purple current from Irish velus, mingling with, the blood of Americans, along that the star of liberty might not set, he could speak to them not as Irishmen but as American citizens adopted into the great family with a right to seaks at the first table.

Ar. Marsh then devoted himself to the Issues this confronted the people of the United States in the present campaign, and from the manner in which his remarks were frequently interrupted by ent unshatic applause it was very wident that the Irish-American citizens fully realize the danger threatening them and the determination on the repart to avert it. During the course of his remarks Mr. Marsh took occasion to refer to the attituce: of England in the present campaign; her undisquised efforts to assist in establishing free tradelin this country and advocating the election of Circle and to accomplish such purposs. He referred to the little teap party that took slace in Roston harbor some years ago, an if England insisted in Keeping her figured in the property of the construction of the owner and in the owner and in the present campaign the course of the republican party in the boasted friendship to the Irish created on naiderable showing that the know-nothing party, of which the oppoments of the republican party were trying to make so much of had its life was only equaled by the outburnt that greated to naiderable and the showing that he know-nothing vote being in the south at the rate of 45 in each 100, rose, while all the northern state; was 2 in 100. In contrast with his he showed what the republican party had done, not for he Irish alone, but for the Germans, French and ul others seeking to make the country their home—the passage of the todacenty and the democratic party had done, not for he Irish alone, but for the constitution which the democratic party is

General Nelson A. Miles, commanding this department

[Heapquarters Dept of the Columbia,]

Vancouver herences, W. T., Oct. 2, 1844.]

To the Adjubant General, Division of the Pacific, Presidio of San Francisco, California.—Sre I have the honor to submit the following med report of military affairs pertaining to this department for the year ending October 1, 1854.

A condition of desired peace has been maintained during the year, hence little requiring especial mention has occurred beyond the ordinary routine duties of the service Wilhin the peat four months there has been a charge of station of nearly all the troops in this department, the Twenty instinantly acceptance, in with the Four-centh infantry from the department of the Parte, and the troops of the First cavalry with the Second cavalry from the department of the Parte, and the troops of the First cavalry with the Second cavalry from the department of the two fields of the commands, and willed increasing their experience and observation in different sections of the country.

I would respectfully recommend, as far as he troops in this department are concerned, that in future they be changed at least once in every four years, and that the distance be not so great as to prevent both infantry and cavalry marching between stations

The discipline and health of this command has been uniformly good.

A lof the military posts save one have been visited during the year by the department countries the proof of the country in the country in the country of the close attention given this subject by officers and the interest and care taken by embated men. The skil, that has been acquired in the use of heriff would render the troops most effective in any future engagement.

The "sexil of the artillery, with the Hotch as redduring camou, has been most satisfactory. The fact of a camoun being fired from the shoulder of an artilleris seems somewhat upvel, jet experience has proved its practices his received in securing these improved the most effective in any future of

reading gramon, has been most sutificatory. The fact of a cannon being fired from the shockler of an artillerst seems somewhat pred, yet experience has proved its practicability with the most effective results. Having taken much merest in securing these improved arms for the light battery, lattled at Vancouver tar racks, and having had opportunities for observing their utility in the field, I can say that the results of recent practice with these guas confirms my opinion, hamely, that they are he nost destructions in aguinst troops of any that have yet been used in the service of our government. Instructions in aguinst troops of any that have yet been used in the service of our government. Instructions in aguinst troops of any that have yet been used in the service of our government. Instructions in aguinst troops of any that have yet been used in the service of our government. Instructions in aguinst troops of any that have yet been used at the fact of the posts of this department. Be ter results would be obtained in more liberal showances were under for a gnal apparatus.

Experiments have been made with the fields tat and the most gratifying results obtained. Caplain F D Haldwin, britth mrantry, assated by Service and Private Galday, I contends in Infantry, stationed at Vancouver larracks, W T, exchanged messages with Second Lieutenaut H C Calsell, Jr., Fourteenth infantry, stationed on his Hood, or, distance fifty miles between instruments used.

Simular results imply the obtained by the use of lectric to in wight signaling.

During the winter months, gymnastic crill and exercises have been added to the duties of the gar-uson at several of the posts, and base on induces very largely to health, strength of the first one, where troops can find benedicti exercise and sunper refreshments at supplit cost, woulk be largely beneficial to any command.

The j rincipal, and I might say the only serious, and that now piecarity in the surple of the supplied and one come to cheek, the officuse I to any command.

The appr

to the Indians and white settlers in the trocally, and to the general government.

Furning the past winter, spring and summer, rany complaints have been received from the lower Columb a river Indians, located between The Dalles and Priest's Hapids, and it has been with great difficulty that serious heathings have been prevented. I have had officers and men engaged in paintying these Indians, who in the main seem well disposed, although by the rapid settlement of the country they have been unjustly deprived, in many instances, of their calitrated grounds, their calimon fisheries and other means of tubelsamene. Numbers of these indians have been assisted by the military in locations.

first thing to no 10 insumant the prestige fair is to popularize at by putting it upon rent fooding. It has reached a condition in to that which the Mechanics, fair of San rent rooting in the Mechanics fair of San in to that which the Mechanics fair of San pace found itself ten years ago. It was a joint stock concern, the controlling incheing in the bands of Mr. P. B. Cornwall, Pank of California. The apathy in the ition increased from year to year, until it became necessary to revise the concern a popular basis. This was done by cretwo classes of members—annual and life he money derived from this source more sufficed to buy up the stock owned by Mr. will and others. This is precisely what to be done here. The Mechanics fair of mit which is now a joint stock affair. no, which is now a joint stock affair dby a few rich men and property holders, to be put upon a popular basis by enlistresy arison and mechanic in Portland and Parliand in its behalf. The only was to applied and a result is to create three classes inherships, to-wit.
